Portfolio: <https://clear-wisdom.github.io>

EDUCATION

Yonsei University

B.A. in Public Administration

Seoul, Korea

Feb.2020 - Feb.2027(Expected)

- GPA: 3.5 / 4.3 | Received Honors in spring of 2020

WORK EXPERIENCE

Human-Data Interaction Lab

Seoul, Korea

Undergraduate Research Intern

Mar.2026 - Present

- Conducted research on a system for trust calibration, with professor [Dae Hyun Kim](#) in [Human-Data Interaction Lab](#).
- Identified a problem that humans tend to over-rely on AI and it is difficult to calibrate fast and accurately.
- Designed a system that adapts its UI based on the users' trust level and expected accuracy on the AI to calibrate trust.

CortexAI

San Francisco, CA (Remote)

Software Engineer Intern

Jan.2026 - Feb.2026

- Designed and implemented AI controllability/transparency features:
 - Plan: Visualized AI's multi-step progress, enabling users to audit and track task completion.
 - Ask: UI offering structured choices, clarifying unclear user input and returning control to the user.
 - History: Enabling users to review and revert document changes like git.
- Received a full-time return offer.

PROJECT & LEADERSHIP EXPERIENCE

Scramble

Seoul, Korea

Solo Founder

Dec. 2025 - Present

- Identified that most learning-support software focuses on generating quizzes rather than giving users' weakness.
- Built a proficiency-scoring algorithm using weighted average calculation.
- Recruited beta-testers and conducted user interviews to define potential feature updates and validate market fit.
- Active users increase by 300% during every exam period.
- Applied harness engineering protocol using Claude Code.

NextEditor, GenAI Contest in Yonsei University

Seoul, Korea

Team member

Sep.2025 - Oct. 2025

- Won the 2nd prize by identifying two inefficiencies in writing workflows: frequent context switching and low-quality data analysis by non-expert users.
- Implemented a text editor that automatically retrieves supporting details based on user-written content.
- Designed a docker-based data visualization and explanation pipeline, enabling users to analyze raw data without writing code or visualization expertise.

ISSU: Student's Society on IT business strategy in Yonsei University

Seoul, Korea

- **Vice President** Jul.2024 - Dec.2024
 - Secured 4 industrial-academia cooperations with Microsoft, Mathpresso, Toss Securities, and Shinhan Bank.
 - Pitched industrial-academia cooperation project to corporate stakeholders, closing contracts with research funding.
- **Microsoft: academic-industrial cooperation** Aug. 2024 - Dec.2024
 - Led a GenAI Product Sales project as a Project Manager.
 - Pitched a university-bundled ChatGPT Plus sales strategy to Microsoft, proposing that free student access would serve as a lock-in model driving post-graduation subscriptions.
 - Proposed the value proposition for universities that integrate school-specific data into ChatGPT Plus and leverage student chat data for institutional insights.
 - Mitigated participant churn during 2-month schedule delay caused by the stakeholder by holding weekly alignment meetings and transparently sharing progress updates with 100 beta testers, limiting the churn rate to ~10%.
- **Samsung Securities: academic-industrial cooperation** Apr.2024 - Jun.2024
 - Won the 1st prize, led the team, achieving a perfect score on team leader evaluation.
 - Proposed a stock recommendation service based on users' spending behavior, utilizing card transactions in MyData 2.0.
 - Executed a quantitative user study (n=74) and identified pain points: high investment interest, low financial literacy.
 - Built a cosine similarity stock recommendation algorithm that shows stocks held by users with similar spending patterns, and stocks with similar financial statements.

ADDITIONAL INFORMATION

- **Language:** Korean (Native), English (Working proficiency)
- **Certifications:** AWS Solutions Architect Associate (AWS-SAA), AWS AI Practitioner (AWS-AIF)
